

**AMENDMENTS TO THE CLAIMS**

This listing of claims will replace all prior versions, and listings, of claims in the application:

Claims 1-23. (Canceled)

Claim 24. (Currently Amended) A server apparatus connected with a transmitting Internet facsimile apparatus and with a receiving Internet facsimile apparatus via the Internet, the server apparatus comprising;

a memory configured to store reception capabilities regarding a type of facsimile data that the receiving Internet facsimile apparatus can receive, the reception capabilities being distinct from the facsimile data; and

a controller configured to receive the facsimile data from the transmitting Internet facsimile apparatus, the received facsimile data having been converted into an Internet transmission format, to transform the received facsimile data into a type of facsimile data that the receiving Internet receiving facsimile apparatus can receive, based on the reception capabilities stored in the memory, and to transmit the transformed facsimile data to the receiving Internet facsimile apparatus, the transformed facsimile data having been converted into the Internet transmission format.

Claim 25. (Currently Amended) The server apparatus according to claim 24, wherein the reception capability regarding a type of facsimile data, that the receiving Internet facsimile apparatus can receive comprises is a type of file data that the Internet receiving facsimile apparatus can receive.

Claim 26. (Previously Presented) The server apparatus according to claim 25, wherein the type of file data is at least one of MH, MR, MMR and JPEG.

P18051.A17

Claim 27. (Canceled)

Claim 28. (Currently Amended) A server apparatus connected with a facsimile apparatus via the Internet, the server apparatus comprising;

a memory configured to store reception capabilities regarding a type of facsimile data that the facsimile apparatus can receive, the reception capabilities being distinct from the facsimile data; and

a controller configured to receive an e-mail from the facsimile apparatus, to determine whether or not an e-mail address included in the received e-mail is a predetermined address, ~~the e-mail with~~ the predetermined address indicating the reception capabilities of the facsimile apparatus to be stored in the memory, the controller being further configured to store the capabilities of the facsimile apparatus in the memory, in response to a determination that the e-mail address is the predetermined address.

Claim 29. (Canceled)

Claim 30. (Currently Amended) A communication terminal capability exchanging method comprising;

storing reception capabilities regarding a type of facsimile data that a receiving Internet facsimile apparatus can receive, the reception capabilities being distinct from the facsimile data;

receiving the facsimile data from a transmitting Internet facsimile apparatus, the received facsimile data having been converted into an Internet transmission format;

P18051.A17

transforming the received facsimile data into a type of facsimile data that a receiving Internet facsimile apparatus can receive, based ~~in~~ on the stored capabilities; and

transmitting the transformed facsimile data to the receiving facsimile apparatus, the transformed facsimile data having been converted into the Internet transmission format.

Claim 31. (Currently Amended) A server apparatus connected with a facsimile apparatus via the Internet, the server apparatus comprising;

a memory configured to store reception capabilities regarding a type of facsimile data that the facsimile apparatus can receive, the reception capabilities being distinct from the facsimile data; and

a controller configured to receive, from the facsimile apparatus, an e-mail with a predetermined address, the ~~e-mail~~ predetermined address indicating that the e-mail contains data regarding the capabilities of the facsimile apparatus to be stored in the memory of the server apparatus, the controller being further configured to store the capabilities of the facsimile apparatus in the memory.

Claim 32. (Previously Presented) An Internet facsimile apparatus connected with a server apparatus via the Internet, the Internet facsimile apparatus comprising;

a communicator configured to communicate with a server apparatus via the Internet; and

a controller configured to transmit, to the server by e-mail, reception capabilities regarding a type of facsimile data that the Internet facsimile apparatus can receive, the transmitted e-mail having a predetermined address, ~~the e-mail with~~ the predetermined

P18051.A17

address indicating that the e-mail contains data regarding the capabilities of the Internet facsimile apparatus to be stored in the server apparatus.

Claim 33. (Currently Amended) The server apparatus according to claim 24, wherein the transmitting Internet facsimile apparatus and the receiving Internet facsimile apparatus comprise Internet facsimile apparatuses.

Claim 34. (Currently Amended) The server apparatus according to claim 24, wherein the controller transmits the transformed facsimile data to the receiving Internet facsimile apparatus via the Internet.
